

The Digital Education Revolution Arrives at Mater Dei

In late June, Mater Dei Pastoral Teacher, Mrs Rebecca Gibbs, Chair of the Mater Dei ICT (Information and Computer Technology) Committee took receipt of a delivery of Macbook computers. These computers were purchased with funds raised at last year's Foundation Dinner.

Rebecca is very excited to have such a valuable teaching resource for the students and staff to access. Rebecca says, "incorporating technology into our teaching programs will empower the students' learning. Our students will participate in a wide range of activities that

will allow them to demonstrate their understanding of content in a variety of ways that is catered to meet their individual needs in a digital style. The computers have a diversity of programs that will assist the students with many aspects of their learning such as their reading and comprehension skills as well as skills related to operating the computer. It is a very exciting time to be involved in such a great program which will benefit all of our students and we are grateful to our supporters for making this possible."
